ATTN:Section 352 - Jewelry Dealer Regulations

I am opposed to implementation of the Section 352 - Jewelry Dealer Regulations.

These proposed rules mean the end of any vestiges of privacy for businesses and citizens of the United States. Congressman Ron Paul has recently said that "privacy is a foundation of liberty," I agree with him.

The proposed rules also violate the individual's 4th ammendment right "to be secure in his person place and effects," and his 5th ammendment right not to "be compelled in any criminal case to be a witness against himself." Additionally it seems to me that since you are compelling businesses to perform a function for the Federal Government without compensation' you are potentially in violation of the 13th ammendment's prohibitions against "involuntary servitude." Therefore, by implementation of the proposed rules, you are potentially opening the government up to endless litigation.

Finally, to the best of my knowledge, no examination of effectiveness of this program - as it currently exists - has been done. Just how effective do you expect this to be? How much is it going to cost us and what do consumers and Citizens of the United States get in return?
